

## REACH

### EU REACH

The REACH regulation 1907/2006 is in force since 1 June 2007. Basically the two most important aims of the chemical legislation are to improve the protection of human health and environment from the risks of chemicals while enhancing the competitiveness of the EU chemicals industry.

In this framework, the article 2.7(b) lists some substances included in Annex V of the legislation which are exempted of registration, as registration is deemed inappropriate or unnecessary.

Salt is a natural substance which is not chemically modified, nor classified as dangerous. So salt is exempted from registration under the current legislation.

### UK REACH

After the EU exit, UK laid down a national UK REACH regulation.

Within this regulation salt is exempt for registration.

This declaration is valid for 3 years.
